Professional turf fertilizer for tees & fairways.  
Mini fairway Grade (SGN 145)

### Product Features

- High rates of potassium.
- Apply when potash is deficient or to improve K, Ca and Mg soil ratios.
- Contains 18% sulphur, 17% calcium and 5% magnesium.
- Contains micronutrients in the sucrate form.
- Ideal for preventing magnesium deficiency.

### Turf Benefits

- Provides a high rate of potassium for improved drought tolerance, greater disease resistance and improved wear tolerance.
- The role of calcium is to promote cell growth and strengthen cell walls and allows the plant to be more tolerant of environmental stresses.
- Magnesium is an essential nutrient that allows for healthy plant growth. It is required in the formation of chlorophyll and the storage of carbohydrates in the root system.
- Designed for use on tees and closely mowed fairways. Mini-sized particle provides excellent distribution at lower application rates.
- Micronutrients sucrate technology increases nutrient availability and uptake throughout the growing season while minimizing mower pick-up with the revolutionary dispersing granule technology.
