## 96% UFLEXX™

### PRODUCT DESCRIPTIONS

- Maintenance fertilizer containing nitrogen and potash in a balanced 1:1 ratio to promote healthy growth and stress resistance.
- 96% of the nitrogen is derived from **UFLEXX™** stabilized nitrogen. **UFLEXX™** is your solution to nitrogen loss. **UFLEXX™** is beneficial for turf and environmentally responsible.
- All the potassium is derived from sulphate of potash, a safe and natural source of potassium and sulphur.

### PRODUCT BENEFITS

- **UFLEXX™** improves nitrogen efficiency, reduces nitrogen loss due to volatilization, leaching and denitrification. The result is an excellent nitrogen source with improved nitrogen efficiency, and an extended response of up to 6 - 8 weeks.
- Designed for use on tees and close-cut fairways. Mini-sized (SGN 145) particles provide excellent distribution, even at lower application rates.
- Provides a high rate of potassium for improved stress tolerance.

## DIRECTIONS FOR USE

- Read the entire label before use. Apply only as directed.
- Apply only to dry foliage.
- **IMPORTANT:** It is recommended to apply fertilizers in the early morning. Water in after application, especially during periods of high temperatures (28°C or above). Avoid applying fertilizer to drought-stressed turf. If turf is under drought stress, water before fertilizer application.
- Watering in after application will accelerate initial green-up and will aid in the movement of fertilizer granules into the turf canopy.
