

Proven Foliar™ Amino Acid Based Products

A-O-K®

1-0-24

A-O-K is designed to be foliar applied and completely foliar absorbed while it is drying on the target plant.

Unique Qualities

- A-O-K has a positive influence on turfgrass by promoting carbohydrate storage, stolon and rhizome growth, heat, cold, and wear tolerance, while increasing the cell strength and improving salinity stress tolerance.
- Regulates the absorption and retention of water by turfgrass plants.
- Potassium is easily leached from the soil especially in sandy soils. Foliar feeding maximizes (K) absorption and utilization.

Proven Foliar Qualities

Our proprietary organic chelating and complexing technology makes the following benefits possible for all of our Proven Foliar products:

- Compatibility
- Foliar absorption
- Highly efficient
- Easy to use
- No burn risk when used as directed
- Low risk of leaching
- Improved uptake and translocation
- Environmental soundness

Application Guidelines

For general Foliar application guidelines please refer to page 27.

Cool Season Turf Grasses:

Apply 3-6 fl. oz. per 1000 ft². Repeat as needed.

Warm Season Turf Grasses:

Apply 3-8 fl. oz. per 1000 ft². Repeat as needed.

GUARANTEED ANALYSIS

Total Nitrogen (N)	1.0%
1.0% Urea Nitrogen	
Soluble Potash (K ₂ O)	24.0%
