

SCOTTISH FESCUE MIX

General Description

Scottish Fescue Mix - is a specially formulated seed mixture designed for natural and low maintenance areas on golf courses. The blend is designed to provide a natural look throughout the entire season. With minimal maintenance the Scottish Fescue Mix will provide a golden brown color in late summer and into the fall, highlighting the golf course and also providing great contrast.

Usage

Scottish Fescue Mix will provide a fast germinating, quick establishing stand that requires little to no maintenance. Once established for best appearance and playability little to no irrigation or fertilizer should be applied.

Adaptation

- Good establishing lawn mixture that is salt tolerant
- Excellent salt & shade tolerance
- Excellent drought tolerance
- New winter tolerant variety
- Insect resistant
- Fast establishment
- Excellent weed control
- Low growth & good density
- Good heat tolerance

Mixture

- 20% Sealink Creeping Red Fescue
- 30% Spartan Hard Fescue
- 15% Victory II Chewings Fescue
- 20% Azay or Azay Blue Sheep Fescue
- 15% Quebec Perennial Ryegrass

Limitations

Weak spreading ability

Seed Rate

New Lawn: 3-4 lbs/1000ft² (2.5-3.25 kg/100m²)

Overseeding: 3.75-5 lbs/1000ft² (3.5-5 kg/100m²)

**Seed rates may vary based on application*

** Mixture components may change at any time*
