

Solu-Cal®

PRODUCT DESCRIPTIONS

- Enhanced, granulated Calcitic lime (Calcium carbonate) with **CARBOXY®** organic acid.
- Use to adjust the pH of acidic soils.
- Contains 36% calcium
- Requires one quarter as much product as a conventional lime.

PRODUCT BENEFITS

- Soil amendment with calcium carbonate and organic chelating agent **CARBOXY™**.
- Used to supply AVAILABLE calcium in the spring and summer. Plants become less prone to diseases and environmental stress.
- The carboxylic acids (**CARBOXY®**) contained in this fertilizer promote root development and increase the plant's ability to absorb nutrients in the soil, even less mobile elements such as calcium.
- The role of calcium is to promote cell growth and strengthen cell walls. Calcium makes the plant more tolerant of environmental stresses.

DIRECTIONS FOR USE

- Read directions before using. Apply only as recommended.
- Follow soil test recommendations for application rates regarding the adjustment of soil pH and calcium levels.
- For new construction, application rate can be higher if the Solu - Cal® is mechanically incorporated into the soil.
- Irrigating after application will aid in the movement of fertilizer granules into the turf canopy.
