

FUTURA BLUE

RYEGRASS/BUEGRASS MIX

DESCRIPTION:

This blend is a combination of Québec and Cutter turf type perennial ryegrass, plus Touchdown Kentucky bluegrass, and Quantum Leap Kentucky bluegrass.

Touchdown and Quantum Leap are outstanding vigorous varieties of Kentucky bluegrass. They are two of the few bluegrasses that can establish in the aggressive and competitive environments of perennial ryegrass, especially in an 80:20 combination.

USAGE:

Futura Blue has all the same qualities of Futura 3000 with the added benefit of Touchdown Kentucky Bluegrass. Use this product where a regular overseeding is usually not required. The ryegrass starts quickly and the bluegrass component will gradually establish and become more dominant over a period of years.

ADAPTATION:

- Fast establishment of the perennial ryegrass component
- Fast growth with a long-term target of establishing a population of Kentucky bluegrass
- Kentucky bluegrass component adds persistence and creeping growth habit

LIMITATIONS:

Not adaptable to deep shade.

SEED RATE:

2.1 kg/100m² or 4.5 lbs/1,000 sq.ft.

**Seed rates may vary based on application*

TECHNICAL PRODUCT SPECIFICATIONS

40% Québec Perennial Ryegrass

40% Cutter Perennial Ryegrass

10% Touchdown Kentucky Bluegrass

10% Quantum Leap Kentucky Bluegrass
